

► **SOLVING** our clients' business problems in the most **ECONOMICAL** way.

COMPANY OVERVIEW

TransTech Consulting, a Blue Horseshoe Company, specializes in distribution design & implementation with the purpose of solving our client's business problems in the most economical way. We offer management consulting, industrial engineering, warehouse management system expertise, distribution design and implementation along with the comprehensive outlook that takes into account all facets of an organization.

Simply put...We find the right solutions that work for YOU!

OUR TEAM

Our staff is comprised of all senior members with extensive experience in both business and engineering. Our consultants are not contract employees, and they are all professionally evaluated to ensure the highest capabilities for analysis, conceptual thinking, leadership, drive and overall professionalism. We evaluate your needs upfront and select the appropriate team for your project, which will remain in place from concept through implementation.

OUR APPROACH

TransTech Consulting understands that no two companies' structures and organizational goals are identical, so we provide customized solutions and services that fit your requirements. We want more than just the typical client/consultant relationship; we want a long-term partnership with our clients. We blend our consultants' technical & functional expertise with your business knowledge, creating a collaborative team of equal partners. Our goal is to provide services that exceed our clients' expectations.

PRIMARY SERVICES:

- Network Analysis & Design
- Warehouse Process Design
- WMS Specification & Selection
- Material Handling System Design
- Strategic Planning
- Transition Planning
- Education, Training, Testing
- Master Project Management

THE RESULTS

Since 1983, TransTech has improved profits for clients in over 50 different industries, from heavy manufacturing to various types of distribution. We start with analysis and strategy and continue through the implementation process, resulting in an operational system that will support future growth projections with increased productivity, management control, and profits. Our typical results are productivity improvements in the range of 30-100%, cost reductions in the range of 25% to 40%, increased employee morale, inventory accuracy exceeding 99.9%, and order accuracy exceeding 99.5%. More specifically, TransTech adds value by projecting a strategic plan with the goals that will be designed specifically for your company.

INDUSTRY EXPERIENCE

Our goal is to position our clients as the most competitive in their respective industries. We serve a client base in widely divergent industries; we know how to speak your language and understand the pain points that your industry faces.

Key industries we service:

- Health Care
- Food, Drug & Beverage
- Third Party Logistics
- Electronic/Technology
- Manufacturer & Wholesale Distribution
- Automotive
- Publishing
- Retail
- Apparel
- Entertainment
