CUSTOM SOLUTIONS THAT WORK FOR YOUR BUSINESS.

BEFORE YOU MAKE ANY COMMITMENTS, TRANSTECH EVALUATES YOUR BUSINESS, OFFERING SEVERAL NO OBLIGATION ANALYSIS'

Read more about each of these processes below....

1. EXISTING OPERATIONAL ANALYSIS

NO OBLIGATION ANALYSIS...

After our initial conversation where we establish the parameters of the survey, our consultants visit your facility. Our mission is to look and listen. We discuss with you and your staff particular areas of concern and examine the details to discover improvement opportunities. We focus on your specific needs, reviewing your current distribution, production, warehousing, systems, material flow, and storage processes. Finally, using our extensive experience, we review the current lead and supervisor usage to determine the appropriate coverage requirements. Our observations are then summarized with various alternatives for improvement measures.

2. OPERATIONS ASSESSMENT REPORT

We prepare a written report summarizing your existing operations, including your current fulfillment requirements, pallet sizes, carton sizes, space, through-put, and other essential operational metrics.

The second part of the report includes recommendations for possible areas of improvement (process, equipment and systems) along with order of magnitude price and schedule. An overview of the specific areas and a detailed description of our findings are included.

Along with the report, TransTech presents our Feasibility Study Proposal to your management team to take these findings to the next level. This presentation will outline specific challenges and areas of concern across all aspects of the distribution operations. Each challenge we identify will be accompanied with prospective alternatives and long-term solutions.

3. FEASIBILITY STUDY

A feasibility study is a detailed assessment of your specific needs. Collectively, TransTech and your staff identify and target areas of your operation needing improvement. Actual operational data is used to analyze and design potential solutions. TransTech tailors the solution to best fit your needs and your culture. Understanding that you know your business and customers best, we apply our expertise to provide an optimal solution.

DELIVERABLES:

- Detailed Engineered Concepts
- Budgetary Pricing & Financial Model
- Implementation Schedule
- Generate Future Pro Forma & Target Metrics
- Executive Presentation

OPTIONAL DELIVERABLES:

- Simulation
- Network Analysis
- Supply Chain Execution Systems Assessment
